The Code of Federal Regulations of the United States of America, 2006 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government Code of Federal Regulations United States. Sections Affected**, 2006-03-14 The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the United States Federal Government **PUR Digest, 4th Series, 1974-1996**, 1997 Annual Digest of Public Utilities Reports, 2005 **Gender and Governance in Rural Services** World Bank, International Food Policy Research Institute, 2010 It focuses India Ethiopia and Ghana and focuses on two public services agricultural extension as an example of an agricultural service and on drinking water as an example of rural service that is not directly related to agriculture but is of high relevance for rural women The Official Railway Guide, 1881 **Access to Utility Service** Charlie Harak, 2008 **The Governance of Western Public Lands** Martin A. Nie, 2008 Examines the conflict surrounding public land management revealing how problematic language in public land laws scarcity of resources and mistrust cloud the debates and offering a range of solutions to help move beyond the dysfunctional status quo management **Airport Offsite Passenger Service Facilities** Arkopal K. Goswami, 2008 Because transportation modes are diverse intermodal connections take several forms They may be comprised of a major hub such as the Virginia Inland Port which transfers freight between the truck and rail modes or an improvement to an existing mode such as storage space for bicycles on buses Between these extremes are park and ride lots which accommodate motorists changing to a transit mode These intermodal connection points share the common purpose of providing a seamless link from one mode to another An example of an intermodal connection is the airport offsite passenger service facility or simply an offsite facility These facilities deliver passengers from a common location to an airport and may provide additional services such as baggage and passenger check in These facilities can exist at train stations cruise line ports resorts or hotels or as separate facilities near major highways Some provide passenger transportation to the airport but not baggage check in some provide baggage check in but not passenger transportation to the airport and some provide baggage and passenger check in as well as transportation to the airport Successful airport offsite facilities offer a benefit to both the passenger and the airport operator Passenger benefits include the seamless transfer of people or baggage operator benefits include the option to

increase airport terminal capacity without the need to acquire additional land for parking or other terminal operations. In the past when offsite facilities failed to provide such benefits they ceased operations. Thus an investment in an offsite facility is not without risk. Where successful these facilities may offer the following public benefits: 1 an alternative airport access mode for air passengers and 2 a way to expand airport landside capacity without taking additional land. To the extent that automobile trips are replaced by public transportation these facilities can serve: 1 to improve air quality and 2 to reduce highway congestion. These opportunities suggest that offsite facilities merit consideration as one tool for improving intermodal connections. This report documents the history, categories, potential risks and benefits and Virginia specific opportunities associated with airport offsite passenger service facilities. A major barrier to implementation is the lack of a methodology for forecasting travel demand. A companion report entitled *Airport Offsite Passenger Service Facilities: An Option for Improving Landside Access Volume II: A Methodology to Determine Demand for Airport Offsite Passenger Service Facilities* will present the results of a study that can assist in evaluating the potential for implementing such a facility in Virginia. **Service Availability**, 2005 **Annual Report** USA Patent Office, 1890 **Americans with Disabilities Cases**, 2007 **The Journal of Housing and Community Development**, 2006 **Senate documents**, 1894 **Oregon Administrative Rules Compilation**, 2014
