Oversight on Passenger Vehicle Roof Strength United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Consumer Affairs, Insurance, and Automotive Safety, 2012 **Jeep** Patrick R.

Foster, 2014-07-15 DIV The definitive fully illustrated celebration of an auto manufacturer that paved its own way by going off road div DIV div DIV Few American vehicles or vehicles made anywhere else in the world for that matter are as universally iconic as the Jeep. From olive drab WWII military relics to the beloved Wrangler with its rear mounted spare tire open air design and telltale roll cage the Jeep is a true classic. In *Jeep: The History of America's Greatest Vehicle* automotive writer Patrick R. Foster chronicles over 70 years of Jeep vehicle design and production. Beginning with the Jeep as a crucial component of the American World War II fleet, Foster expertly recounts the corporate shifts, financial struggles, and successes, close calls, and above all the enduring machines that have carried Jeep from the early 1940s to its triumphant role as a modern day embodiment of American perseverance. Three hundred color and black and white historical photos complement his expertly written narrative of Jeep's entire history, reminding us that sometimes the road less traveled was just waiting for the right truck. div

Federal Register, 2002-12 **No Accident** Neil Arason, 2014-04-29

It is possible to eliminate death and serious injury from Canada's roads. In other jurisdictions the European Union centres in the United States and at least one automotive company aim to achieve comparable results as early as 2020. In Canada, though citizens must turn their thinking on its head and make road safety a national priority. Since the motor vehicle first went into mass production, the driver has taken most of the blame for its failures. In a world where each person's safety is dependent on a system in which millions of drivers must drive perfectly over billions of hours behind the wheel, failure on a massive scale has been the result. When we neglect the central role of the motor vehicle as a dangerous consumer product, the result is one of the largest human-made means for physically assaulting human beings. It is time for Canadians to embrace internationally recognized ways of thinking and enter an era in which the motor vehicle by product of human carnage is relegated to history. **No Accident** examines problems related to road safety and makes recommendations for the way forward. Topics include types of drivers, human-related driving errors, related to fatigue, speed, alcohol, and distraction, and roads, pedestrians, cyclists, and public transit. Road engineering, motor vehicle regulation, auto safety design, and collision avoidance technologies such as radar and camera-based sensors on vehicles that prevent crashes. This multi-disciplinary study demystifies the world of road safety and provides a road map for the next twenty years.
