Teaching IFRS Richard M.S. Wilson, Ralph Adler, 2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards IFRS highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of and insights into the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS related classroom innovations and the associated student outcomes achieved therefrom the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS related teaching resources to support those courses. This book was originally published as a special issue of Accounting Education An international journal

IFRS and XBRL Kurt Ramin, Cornelis Reiman, 2013-03-27 International Financial Reporting Standards are increasingly adopted worldwide and it is critical to understand their place within the global business environment as well as the most up to date methods of applying them. In IFRS and XBRL Kurt Ramin and Cornelis Reiman world authorities on IFRS have condensed the overwhelming flood of available material to present a comprehensive guide to the key components of IFRS helping to explain why they are a priority for private enterprises and governments alike. The book provides valuable commentary on key components of IFRS which are crucial to local national and international business decision making. It demonstrates the importance of disclosure checklists, offers illustrative financial statements arising from IFRS, looks at recent developments in IFRS in particular how the standards should be reflected in the narrative report and what implications they have for sustainability reporting. It explores how business reporting can be improved for example through the addition of non financial reporting, examines the key issue of emerging technology in reporting under IFRS especially the use of XBRL and the obvious push for a new paradigm whereby object definitions, tracking and valuation offer considerable benefits to the people who produce and rely upon business reports. To complete the picture the authors examines other standards and cover important issues such as US
