Routledge Handbook of Gender and Corruption Sope Williams, Maria Krambia Kapardis, Lisa A. Kihl, 2025-12-31 The Routledge Handbook of Gender and Corruption showcases the most innovative and exciting research being conducted in this area of study providing a comprehensive go to reference for all who are interested in the topic In the last two decades there has been an increasing awareness of the importance of understanding the nexus between gender and corruption in terms of understanding the way men and women experience corruption and the differential impact of anti corruption frameworks on men and women as well as an understanding of how women in different spaces affect the prevalence and kinds of corruption This Handbook examines these issues as well as the role of social and gender norms in relation to corruption This understanding is crucial for our ability to design anti corruption frameworks that are effective and do not create unintended consequences for any group Despite the importance of this issue there remains a lack of in depth analytical and geographically diverse investigations into the nexus of gender and corruption This book addresses this gap by providing a comprehensive multidisciplinary geographically balanced treatise on gender and corruption This book combines sectoral thematic and country specific studies to allow readers to easily compare differing perspectives and approaches on cutting edge issues and their implications for gender and corruption Key sectors such as education politics public procurement healthcare sport sanitation and immigration are considered as well as the role of new technologies in supporting whistleblowing This Handbook provides academics practitioners and graduate researchers of public policy public administration law and anti corruption with all of the tools they need to understand the nuances of gender and corruption

**Corrupted** Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional

integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly
