## E/M Documentation Assessment Using the TrailBlazer Method

Applicable to Medicare patient encounters in Texas, Virginia, Delaware, Maryland and District of Columbia

There are several different Medicare carriers, of which TrailBlazer is one, and each may have its own set of documentation guidelines. TrailBlazer is the Medicare carrier for Texas, Virginia, Delaware, Maryland and the District of Columbia. Medical documentation audits are broken into 3 categories: History, Exam and Medical Decision Making. Medical Decision Making is determined by the complexity of decision making and is further subdivided into 3 categories: Number of Diagnoses and/or Treatment Options, Data Reviewed or Ordered, and Risk of Complications, Morbidity or Mortality. The values of the subcategories of Medical Decision Making are then used to determine the complexity of Medical Decision Making. The values (supported by documentation) for the History, Exam and the Complexity of Medical Decision Making are then used to determine the overall patient encounter code.
