La Chatte:

LA Chatte Colette, 1955-06-01 *La Chatte* Colette, 1965 , **The public examination French class book, materials for reading and translation, arranged by M. Deshumbert** Marius Deshumbert, 1897 World War II: The Resistance C. David North, 2015-04-29 France fell to Hitler's forces in less than two months. It was not until 1942 that widely dispersed underground organizations would band together to form a united opposition to the occupying Germans. It was not until then that resistance would become the Resistance, a disciplined multi-national movement that would play a significant part in the outcome of World War II. In each occupied nation, resistance groups would grow, gathering and sending information to London, planning increasingly complex sabotage operations and assisting thousands of people, particularly Jews, in fleeing Nazi-occupied territories. Their actions would eventually become a focused counteroffensive against the German army in 1944 when Allied troops gathered in Great Britain to prepare for the invasion of France. As their widespread activity weakened German outposts in France and other occupied countries, the Allies would gain the foothold they needed to win the war. This is their story. **Constructing Modernity** Martin Hammer, Professor Christina Lodder, Naum Gabo, Christina Lodder, 2000-01-01 Naum Gabo 1890-1977 whose eventful life took him from his native Russia to Berlin, Paris, London, and finally the United States, achieved renown as one of the most inventive and controversial figures in twentieth-century sculpture. This book is the first comprehensive account of Gabo's life, career, and artistic theory and practice. Martin Hammer and Christina Lodder explore in detail the evolution of the artist's work and his aesthetic concerns: creative processes, assimilation of such new materials as plastic, and approach to public sculpture. The authors also examine his response to the scientific and political revolutions of his age and trace the origins and development of Gabo's utopian conviction that Constructivist art was profoundly in tune with modernity, social progress, and advances in science and technology. Drawing on Gabo's extensive and largely unpublished archives of letters, diaries, notebooks, models, and sketchbooks, Hammer and Lodder discuss the sculptor's work in the context of his relations with other avant-garde artists, architects, and critics, including his brother Antoine Pevsner. They also situate his aesthetic theory and practice within the Constructivist movement.
