

# 1 SAFETY

## 1-1 INTRODUCTION

In order to protect the investment for the boat and outboard, they must be cared for properly while being used and when out of the water. Always store the boat with the bow higher than the stern and be sure to remove the transom drain plug and the lower half drain plugs. If any type of cover is used to protect the boats, be sure to allow for some movement of air through the hull. Proper ventilation will assure郎prevention of any condensation that may form due to changes in temperature and humidity.

## 1-2 CLEANING, WAXING, AND POLISHING

Any boat should be washed with clean water after each use to remove surface oils and any salt deposits from use in salt water. Regular cleaning will extend the time between waxing and polishing. It will also give you "sparkle all summer long", by having a sharp looking gleam off equipment. If this greater, a mild detergent, and a brush will be required to remove stubborn oil, oil, and other unsightly deposits.

Stay away from harsh abrasives or strong chemical cleaners. A white buffing compound can be used to restore the original gloss to a scratchless hull, or faded area. The finish of your boat should be thoroughly cleaned, buffed, and polished at least once each season. Take care when buffing or polishing with a marine cleaner not to overheat the surface you are working, because you will burn it.

## 1-3 CONTROLLING CORROSION

Since man first started out on the water, corrosion on his craft has been his enemy. The first form was merely rust in the wood

and then it was rust followed by other forms of destructive corrosion in the more modern materials. One defense against corrosion is to use similar metals throughout the boat. Even though this is difficult to do in designing a new boat, particularly the undercarriage, similar metals should be used whenever and wherever possible.

A second defense against corrosion is to insulate dissimilar metals. This can be done by using an exterior coating of Sea Skin or by insulating them with plastic or rubber gaskets.

Marine equipment mounted on a boat in a sheltered environment prevents the growth of marine bacteria off the boat.
