*An Intellectual Biography of Africa* Francis Kwarteng, 2022-07-13 Africa is the birthplace of humanity and civilization. And yet people generally don't want to accept the scientific impression of Africa as the birthplace of human civilization. The skeptics include Africans themselves a direct result of the colonial educational systems still in place across Africa and even those Africans who acquire Western education particularly in the humanities have been trapped in the symptomatology of epistemic peonage. These colonial educational systems have overstayed their welcome and should be dismantled. This is where African agency comes in. Agential autonomy deserves an authoritative voice in shaping the curricular direction of Africa. Agential autonomy implicitly sanctions an Afrocentric approach to curriculum development pedagogy historiography literary theory indigenous language development and knowledge construction. Science technology engineering mathematics information and communications technology STEM ICT and research and development R D both exercise foundational leverage in the scientific and cultural discourse of the kind of African Renaissance Cheikh Anta Diop envisaged. Mr Francis Kwarteng has written a book that looks at some of the major distortions of African history and Africa's major contributions to human civilization. In this context Mr Kwarteng joins a long list of thinkers who roundly reject the foundational Eurocentric epistemology of Africa in favor of an Afrocentric paradigm of Africa's material spiritual scientific and epistemic assertion. Mr Kwarteng places S T E M and a revision of the humanities at the center of the African Renaissance and critiques Eurocentric fantasies about Africa and its Diaspora following the critical examples of Cheikh Anta Diop Ama Mazama Molefi Kete Asante Abdul Karim Bangura Theophile Obenga Maulana Karenga Mubabingo Bilolo Kwame Nkrumah Ivan Van Sertima W E B Du Bois and several others. Readers of this book will be challenged to look at Africa through a critical lens. Ama Mazama editor author of Africa in the 21st Century Toward a New Future. There are countless books about the evolution of European intellectual thought but scarcely any that captures the pioneering contributions of Africans since the beginning of recorded knowledge in Kemet a.k.a. Ancient Egypt. Well that long drought has ended with the publication of Kwarteng's *An Intellectual Biography of Africa* A Philosophical Anatomy of Advancing Africa the Diopian Way. *Policy-Making in the GCC* Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East. Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region. This book analyses the vital

role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike
