Reading Goals Workshop

Using the I.D.E.A. laws and scientifically based reading research to ensure targeted intervention that meets a child's individual needs

We often hear about "data driven" goals and that needs determine goals. This is true, but the data collected and the "needs" that are assessed must be understood as special education law and the science of reading are implemented together. This workshop for reading specialists, teachers, psychologists, educational evaluators, advocates or other professionals, and of course parents walks through the intersection of I.D.E.A. reading guidelines and scientifically based decision making during the IEP process. This workshop aims to improve reading goal writing or reading goal advocacy for participants. Please plan to review or preview materials suggested to make the best of our time together.
