*Chassis Handbook* Bernhard Heißing, Metin Ersoy, 2010-11-09 In spite of all the assistance offered by electronic control systems the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics this book examines these conventional elements and their interaction with mechatronic systems. First it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references this new edition already includes a number of improvements over the first edition.

*Ubiquitous Computing and Ambient Intelligence* Jose Bravo, Diego López-de-Ipina, Francisco Moya, 2012-11-28 This book constitutes the refereed proceedings of the 6th International Conference on Ubiquitous Computing and Ambient Intelligence UCAMI 2012 held in Vitoria Gasteiz Spain in December 2012. The 70 research papers were carefully reviewed and selected from various submissions. The main focus of this book has been to explore how Ambient Intelligence can contribute towards smarter but still more sustainable environments. Beyond sustainable computing the proceedings also include research work describing progress on other key research topics for AmI such as human environment mobile mediated through NFC or AR interaction, artificial intelligence techniques to foster user and context aware environment adaptation, future internet trends such as social networks analysis, linked data or crowd sourcing applied to AmI, internet connected object ecosystems, collaborating to give place to smarter environments.
