

Seafloor Spreading

Objectives:

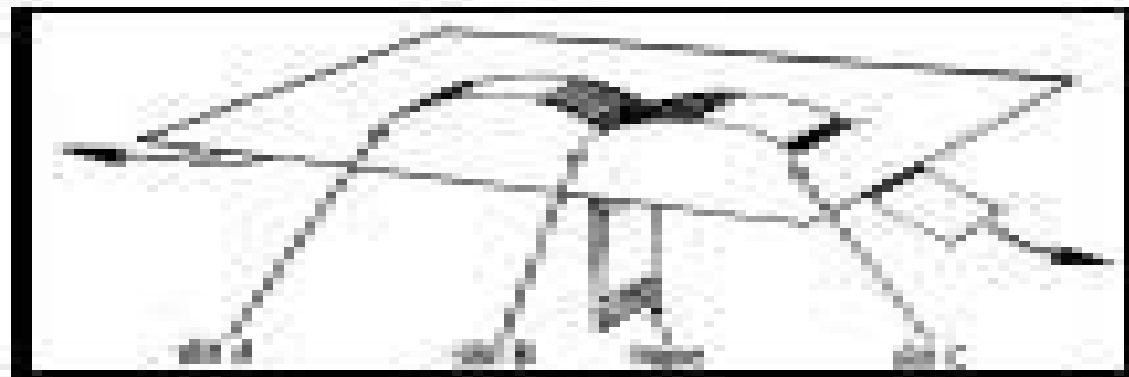

Along the mid-ocean ridges of the world, new oceanic crust is being created. Although this process takes place continuously, it is difficult to observe directly. In the following activity, you will build a model to help understand this process.

Materials:

Colored Paper
Scissors
Tape

Procedure:

1. Cut along the dotted lines of the seafloor-spreading model pattern.
2. Cut the strips, indicated on the base strip with colored pencils.
3. Tape together the template made of the strips with the colorfastness through each strip.
4. Thread the base strip through Holes.
5. Pull the strip down through Hole A, another strip through Hole C.
6. Pull the strip through the slot, as that indicates where the fault ridge, diverges from Hole B and disappears into Hole D and C at the spreading.

Answer Sheet For Seafloor Spreading With Lab
