Answering Inferential Questions Ks2

Andrew Jennings

Answering Inferential Questions Ks2:

Handbook of the Logic of Argument and Inference R.H. Johnson, H.J. Ohlbach, Dov M. Gabbay, John Woods, 2002-09-11 The Handbook of the Logic of Argument and Inference is an authoritative reference work in a single volume designed for the attention of senior undergraduates graduate students and researchers in all the leading research areas concerned with the logic of practical argument and inference. After an introductory chapter the role of standard logics is surveyed in two chapters. These chapters can serve as a mini course for interested readers in deductive and inductive logic or as a refresher. Then follow two chapters of criticism one the internal critique and the other the empirical critique. The first deals with objections to standard logics as theories of argument and inference arising from the research programme in philosophical logic. The second canvasses criticisms arising from work in cognitive and experimental psychology. The next five chapters deal with developments in dialogue logic interrogative logic informal logic probability logic and artificial intelligence. The last chapter surveys formal approaches to practical reasoning and anticipates possible future developments. Taken as a whole the Handbook is a single volume indication of the present state of the logic of argument and inference at its conceptual and theoretical best. Future editions will periodically incorporate significant new developments
