

TesiraFORTE X 400/800/1600

Installation & Operation Guide

Product Description

The TesiraFORTE X 400/800/1600 products are conference room DSPs featuring multiple network and analog audio connection points. With four, eight and 16 channels of Acoustic Echo Cancellation (AEC) respectively, users can choose the model that meets the number of microphones required for the room.

FORTE X is designed to be used primarily with Biamp's beam-forming microphones, PoE amplifiers and speakers. A system including these elements and a UC-room system, display and camera will provide a complete technology solution for a UC-enabled conference room.

The function of the FORTE X is to process local Biamp microphone input and speaker output signals in support of audio-only and audio/video conference calls from dedicated conference rooms. The information provided by this manual relates to physical connections and device setup.

Setup and Use

FORTE X works out-of-the-box and requires no configuration nor is Tesira software required. An embedded, intuitive web interface is provided for setup and programming. FORTE X also offers a programmable platform that requires an experienced professional to configure.

Blamp Launch

Blamp Launch technology offers automatic device discovery and tuning without the need for custom programming. In addition, FORTE X provides the user with a full performance report for the meeting space upon completion.

The Launch may be initiated from the Launch button on the Audio page of the embedded user interface or from the Launch button on the front of the device itself. See [page 10](#) for more information on launching the FORTE X.
