

## 16.4 Evidence of Evolution

### Lesson Objectives

- Explain how geologic distribution of species relates to their evolutionary history.
- Explain how fossils and the fossil record document the descent of modern species from ancient ancestors.
- Describe what homologous structures and embryology suggest about the process of evolutionary change.
- Explain how molecular evidence can be used to trace the process of evolution.
- Explain the results of the Grants' investigation of adaptation in Galapagos finches.

### Lesson Summary

**Biogeography** Biogeography is the study of where organisms live now and where they and their ancestors lived in the past. Two biogeographical patterns are significant to Darwin's theory:

- ▶ The first is a pattern in which closely related species differentiate in slightly different climates. The Galapagos tortoises and finches follow this pattern.
- ▶ The second is a pattern in which very distantly related species develop similarities in similar environments. The rheas, ostriches, and emus fall into this pattern.

### The Age of Earth and Fossils

- ▶ Radio-active dating techniques have confirmed that Earth is ancient—approximately 4.5 billion years old.
- ▶ Recent fossil finds document intermediate stages in the evolution of many groups including whales, birds, and mammals.

### Comparing Anatomy and Embryology

- ▶ Homologous structures are shared by related species and have been inherited from a common ancestor. Similarities and differences among homologous structures help determine how recently two groups shared a common ancestor.
  - Body parts that share a common function, but neither structure nor common ancestry, are called **analogous structures**. Analogous structures do not provide any evidence for evolutionary descent.
  - Homologous structures that are greatly reduced in size or have little to no function are called **vestigial structures**.
  - Many homologous structures develop in the same order and in similar patterns during the embryonic, or pre-birth, stages of related groups. These similarities provide further evidence that the animals share common ancestors.

**Genetics and Molecular Biology** At the molecular level, the universal genetic code and homologous molecules such as genes and proteins provide evidence of common descent.

**Testing Natural Selection** Scientists have designed experiments to test natural selection. Observations of Galapagos finches confirm that competition and environmental change drive natural selection.

Campbell, 1987 **Controversy**

**and Confrontation** Frans H. van Eemeren, Frans Hendrik Eemeren, Bart Garssen, 2008 The essays that are collected in *Controversy and Confrontation* provide a closer insight into the relationship between controversy and confrontation that deepens our understanding of the functioning of argumentative discourse in managing differences of opinion. Their authors stem from two backgrounds. First the controversy scholars Dascal, Marras, Euli, Regner, Ferreira, and Lessl discuss historical controversies in science both from a theoretical and an empirical perspective. Saim concentrates on a historical controversy. Fritz provides a historical perspective on controversies by analyzing communication principles. Second the argumentation scholars Johnson, van Laar, van Eemeren, Garssen, and Meuffels address theoretical or empirical aspects of argumentative confrontation. Aakhus and Vasilyeva examine argumentative discourse from the perspective of conversation analysis. Jackson analyzes argumentative confrontation in a recent debate between scientists and politicians. Last but not least two contributors, Kutrov, tz, and Zempl, n, make an attempt to bridge the study of historical controversy and the study of argumentation.

Colorado, 1896 **One Blood for Kids** Ken Ham, 2018-08-30 Go to the heart of this cultural issue. Racism cannot be solved by laws, educational programs, or secular science. It is a sin and only God has the solution. Discussions about race are too often confused with political correctness or cultural buzzwords. Yet it is vital to have this difficult conversation with children in a way they can understand. And God has given us a simple, powerful answer in the Bible. Reveals how biblical history makes clear what science is only now understanding. Addresses cultural differences, people groups, and the science of skin tones.

Sweeps away the flawed evolutionary foundation of racism with God's enduring truth Apologetics powerhouse Ken Ham provides children important insight and a biblical foundation that combats the idea of human races From the Garden of Eden to our world today there is just one race the human race Once you understand that racism loses its power *Index Medicus* ,2003 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings **The Illustrated Origins Answer Book**
