

Troubleshooting Your: iMac Lines On Screen

1

Reboot Your iMac

A simple restart can help with many temporary issues and system glitches. So it's worth trying out before any other ways to fix lines on the MacBook screen.

To restart your iMac:

1. Click on the Apple sign at the top-left.
2. Choose Restart.

2

Check Cable Connection

Make sure to check for a proper connection to your screen to eliminate issues with the cable. Try to unplug the screen from the Mac and disconnect the power cable. Once connecting back, ensure that both ends are securely attached. You can also try to switch it for a new cable or use a different connection type like USB, HDMI, VGA, DVI, etc.

3

Update iMac to the Latest OS

Update via System Preferences:

1. Click the Apple menu in the top-left corner of your screen.
2. Select "System Preferences."
3. Click on "Software Update."
4. Your Mac will check for available updates. If there's a new macOS version available, it will be listed here.

Download and Install the Update:

1. If an update is available, click the "Upgrade Now" or "Install" button next to it.
2. Follow the on-screen instructions to download and install the update.
3. Your Mac will restart during the installation process.

4

Reset NVRAM

How to reset NVRAM

1. Shut down your Mac, then turn it on and immediately press and hold these four keys together: Option, Command, P, and R. You can release the keys after about 20 seconds, during which your Mac might appear to restart.
 - On Mac computers that play a startup sound, you can release the keys after the second startup sound.
 - On Mac computers that have the Apple T2 Security Chip, you can release the keys after the Apple logo appears and disappears for the second time.
 - If your Mac is using a firmware password, this key combination does nothing or causes your Mac to start up from macOS Recovery. To reset NVRAM, first turn off the firmware password.
2. When your Mac finishes starting up, you might want to open System Preferences and adjust any settings that were reset, such as sound volume, display resolution, startup disk selection, or time zone.

Still not able to resolve your issue?
No worries! Send us a message, we are happy to work with you.
