

# TRAILER TOWING SELECTOR

## TO USE THESE CHARTS

Select column with transmission, cab design and drive system (4b42 or 4x4) you prefer.

Read down column to find the trailer weight that can be towed with engine/drive ratio combinations listed at left. GCWR column shows maximum allowable combined weight of vehicle, trailer and cargo (including passengers) for each engine/drive ratio combination. **Maximum Loaded Trailer**

Weight assumes towing vehicle with mandatory options, no cargo and driver (150 pounds) only. Weight of additional options, passengers, cargo and hitch must be deducted from this weight. Also check Required and Recommended Equipment on page 15.

### Ride Height Considerations on Super Duty 4x4 Pickups

The tough monobeam front axle and spring capacity result in a durable vehicle

with the following ride heights you will need to consider when towing a fifth-wheel or gooseneck trailer:

Model	Max. Ride Ht.*
F-250	56-57 inches
F-350 SRW	58-59 inches
F-350 DRW	57-58 inches

\*Vehicles with other configurations may have varying ride heights.
