Austin have assembled experienced expert researchers to provide graduate students and research assistants with a comprehensive framework for conducting many types of psychology research. The book is organized around the idea of a research script following the step-by-step process of research planning, design, data collection, analysis, and disseminating research. Many chapters are coauthored by advanced graduate students to give their fellow students a sense of real-world research, adding to the clarity and practicality of many chapters. Students and instructors alike will appreciate chapters on topics typically missing from introductory methods texts, including applying for research grants, dealing with journal editors and reviewers, working within research teams, and conducting cross-cultural research. Structures such as recommended readings and exercises guide students to develop and expand their research skills. New chapters include Power and Evidence, IRB as Critical Collaborators in Research, Alternative Data Collection Strategies, Structural Equation Modeling, and Replicability and Reproducibility. A comprehensive, easy-to-understand guide to the entire research process, this book quickly and efficiently equips advanced students and research assistants to conduct a full research project. A Concise Guide to Writing a Thesis or Dissertation provides clear, succinct, and intentional guidelines about organizing and writing a thesis or dissertation. Part I provides an overview for writing a thesis or dissertation. It describes the big picture of planning and formatting a research study from identifying a topic to focusing on writing quality. Part II describes the framework and substance of a research study. It models the pattern generally found in a formal five-chapter research study. Each chapter of a thesis or dissertation has a specific purpose, and this book focuses on each in an easy-to-follow structure. Chapter One reviews the headings and contents expected in the introduction of a study. Chapter Two provides advice for writing a literature review. Chapter Three discusses what to include when describing the methodology. These first three chapters form the proposal section of a study. Two additional chapters present results. Chapter Four provides discussion and conclusions. Chapter Five. Appendices offer resources for instructors and students, including a rubric for evaluating writing exercises to strengthen skills in APA format, sample purpose statements, a research planning organizer, and a guide for scholarly writing. The book is designed overall to be a practical guide and resource for students for their thesis or dissertation process. Note to readers: Due to publishing limitations, some of the titles within the book do not accurately conform with APA format. For precise APA format, please see the APA manual.
