Practitioner's Guide to Global Investigations Judith Seddon, 2018-01-19 There's never been a greater likelihood a company and its key people will become embroiled in a cross border investigation. But emerging unscarred is a challenge. Local laws and procedures on corporate offences differ extensively and can be contradictory. To extricate oneself with minimal cost requires a nuanced ability to blend understanding of the local law with the wider dimension and in particular to understand where the different countries showing an interest will differ in approach, expectations or conclusions. Against this backdrop GIR has published the second edition of *The Practitioner's Guide to Global Investigation*. The book is divided into two parts with chapters written exclusively by leading names in the field. Using US and UK practice and procedure, Part I tracks the development of a serious allegation whether originating inside or outside a company, looking at the key risks that arise and the challenges it poses along with the opportunities for its resolution. It offers expert insight into fact gathering including document preservation and collection, witness interviews, structuring the investigation, the complexities of cross border privilege issues and strategising effectively to resolve cross border probes and manage corporate reputation. Part II features detailed comparable surveys of the relevant law and practice in jurisdictions that build on many of the vital issues pinpointed in Part I.

The ESC Textbook of Intensive and Acute Cardiovascular Care Marco Tubaro, Pascal Vranckx, Susanna Price, Christiaan Vrints, Eric Bonnefoy, 2021-03-08 The ESC Textbook of Intensive and Acute Cardiovascular Care is the official textbook of the Acute Cardiovascular Care Association (ACVC) of the ESC. Cardiovascular diseases (CVDs) are a major cause of premature death worldwide and a cause of loss of disability-adjusted life years. For most types of CVD, early diagnosis and intervention are independent drivers of patient outcome. Clinicians must be properly trained and centres appropriately equipped in order to deal with these critically ill cardiac patients. This new updated edition of the textbook continues to comprehensively approach all the different issues relating to intensive and acute cardiovascular care and addresses all those involved in intensive and acute cardiac care: not only cardiologists but also critical care specialists, emergency physicians and healthcare professionals. The chapters cover the various acute cardiovascular diseases that need high quality intensive treatment as well as organisational issues, cooperation among professionals and interaction with other specialities in medicine.

SECTION 1 focusses on the definition, structure, organisation and function of ICCU's, ethical issues and quality of care. SECTION 2 addresses the pre-hospital and immediate in-hospital ED emergency cardiac care. SECTIONS 3-5 discuss patient monitoring, diagnosis and specific procedures: Acute coronary syndromes (ACS), acute decompensated heart failure (ADHF) and serious arrhythmias. SECTIONS 6-8 The main other cardiovascular acute conditions are grouped in SECTION 9. Finally, SECTION 10 is dedicated to the many concomitant acute non-cardiovascular conditions that contribute to the patient's case mix in ICCU. This edition includes new chapters such as low cardiac output states and cardiogenic shock and pacemaker and ICDs troubleshooting and chapters have been extensively revised. Purchasers of the print edition will also
