Agricultural Reform in Rwanda Chris Huggins, 2017-10-15 International observers have lauded Rwanda as an example of an African country taking control of its own development trajectory and as a market friendly destination for investment. A key component of this narrative has been an ambitious programme of agricultural reform involving private firms, NGOs and international charities. The Rwandan government claims these reforms have been a resounding success, tripling crop yields and helping to combat hunger. Chris Huggins argues however that Rwanda's liberal modernising image sits poorly with the regime's continuing authoritarian tendencies. Featuring in-depth case studies of the effects of agricultural reform in three different regions and drawing on hundreds of interviews, Huggins shows that the much vaunted liberalization of agriculture has in fact depended on the coercion of Rwandan farmers and in many cases has had a detrimental impact on their livelihoods. With the Kagame regime now coming under increasing international scrutiny, this work provides a timely look at the impact of market friendly authoritarianism in contemporary Africa, making essential reading for students and scholars of development in the fields of sociology, anthropology, political science and economics. **The Uganda Gazette**

Uganda, 2012-07 Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress, development and globalization, the latter a form of human and economic homogenization. These processes, through the aegis of the United Nations, are comparatively monitored. Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance. For nearly seventy years, India has sought its place in this global endeavour, yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila. Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non-Western settings. As a consequence, development programmes often fail because they are unable to ask the right questions, but equally important is the political economy derived from foreign aid. For politicians, there is no long term benefit to be derived from successful development. In general, foreign aid only serves to corrupt governments and politicians and, in the end, does very little for those who need help. The struggling states of Bihar and Mithila serve as extreme examples of India's problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition and patterns of behaviour that can be traced

back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates *Reimagining Capitalism in a World on Fire* Rebecca Henderson, 2021-05-13 SHORTLISTED FOR FT one that can simultaneously make a positive societal impact by confronting the realities of the environment and the need to address social and economic inequality while also delivering sustained financial performance to ensure economic growth that brings prosperity and wellbeing to society as a whole Drawing on the lessons of companies from around the world who are acting on this responsibility who are not only surviving but are thriving becoming leaders in their industries and beginning to drive the wheels of change Professor Henderson proves that this is not only a moral imperative for business but also the only way to remain competitive in our changing world _____ You need to read Rebecca Henderson's *Reimagining Capitalism in a World on Fire* This is a book for the realist with a heart Arthur C Brooks president emeritus American Enterprise Institute senior fellow Harvard Business School and author of *Love Your Enemies* *Reimagining Capitalism in a World on Fire* is a breath of fresh air Written in lively prose easily accessible to lay readers and chock full of interesting case studies Henderson comprehensively surveys what we need to do to secure a workable future Larry Kramer president Hewlett Foundation **Reimagining Capitalism** Rebecca Henderson, 2020-04-30 LONGLISTED FOR FT MCKINSEY BUSINESS BOOK OF THE YEAR 2020 WHAT IF BUSINESS COULD HELP SOLVE THE GREATEST PROBLEMS OF OUR TIME Free market capitalism is one of humanity's greatest inventions and the greatest source of prosperity the world has ever seen At the same time its single minded pursuit of profit has led to rampant inequality and the looming threat of climate catastrophe and now threatens to destroy the society on which it depends Rebecca Henderson John and Natty McArthur University Professor at Harvard University argues that business can simultaneously make a positive impact on the world by confronting the realities of our environmental crisis and the need to address social and economic inequality while also delivering the sustained economic growth that brings prosperity and wellbeing to society as a whole Drawing on lessons from companies from around the world who are already making a positive difference *Reimagining Capitalism* shows that this new approach is not only a moral imperative but also an extraordinary opportunity to drive growth and innovation in an increasingly competitive world And perhaps most critically she suggests that it has the potential to balance the power of the market with the power of democratic accountable government and strong civil society the only long term solution to the problems that we face This powerful and readable book is a clarion call for reimagining and remaking capitalism We can have a more moral and more innovative capitalism There is hope Daron Acemoglu coauthor of *Why Nations Fail* [Unlocking Africa's Business Potential](#) Landry Signe, 2020-04-07 Africa welcomes business investment and offers some of the world's highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long term investments with favorable returns Africa has been one of the world's fastest growing regions over the past decade and by 2030 will be home to nearly 1

7 billion people and an estimated 6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier and business expansion will generate jobs for women and youth who represent the vast majority of the population. Current economic growth and poverty alleviation efforts mean that more than 43 percent of the continent's people will reach middle or upper class status by 2030. *Unlocking Africa's Business Potential* examines business opportunities in the eight sectors with the highest potential returns on private investment—the same sectors that will foster economic growth and diversification, job creation and improved general welfare. These sectors include consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking and infrastructure and construction. The book's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth along with long term market projections to inform decision making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments including how to remove barriers to business and accelerate development of the private sector.
