

Installation Instructions

LT-22M-TT-01

WARNING! Install all equipment in accordance with the National Electric Code and in a manner acceptable to the local authority having jurisdiction. Read these instructions and the AXM Installation & Operations Guide carefully before installing equipment. Failure to follow all instructions may result in equipment damage or a hazardous condition.

ATTENTION! Installez tout le matériel en conformité avec le Code national de l'électricité et d'une manière acceptable pour l'autorité locale compétente. Lisez ces instructions et le guide d'installation et fonctionnement de l'AXM avant l'installation du matériel. Le non respect des instructions peut entraîner des dommages matériels ou une situation dangereuse.

Overview

Control the AXM with a VLX or ACM with a Dual Port EIA-485 Option Card. AXMs can be combined with EXPs.

Fig. 1 Typical AXM (MO expansion module). AXM-1048 shown

- ◆ Mount the AXM in a clean, dry, indoor location, out of direct sunlight, and avoid excessive vibration and electrical noise.
- ◆ Keep temp. between 32 deg. F–131 deg. F (0 deg. C–55 deg. C) and relative humidity between 0–95%, non-condensing.
- ◆ The AXM, VLX and ACM can be mounted in separate enclosures if the enclosures are immediately adjacent and the AXM communications bus runs in conduit that does not contain any high-voltage wiring.
- ◆ Mount the AXM in any vertical or horizontal orientation.
- ◆ Use single-point grounding and separate 24 VAC power for the IO loads to help ensure proper grounding.

- Properly ground the panel, then terminate grounded components of power, communications, and I/O wiring

Power

Each AXM requires a 24 VAC, 50-60Hz, 20 VA minimum power supply. Use a UL Listed transformer. VLXs, AXMs and EXPs are half-wave devices so they may share an appropriately sized transformer. Use a separate transformer to power AXM and EXP BOs. AXM and EXP power consumption ranges from 10 VA to 20 VA, depending on the number and type of input devices connected.

WARNING! The ACM is a full-wave device. All full-wave devices must have a dedicated transformer.

WARNING! Half-wave and full-wave devices cannot share a transformer or equipment damage will occur. If a VLX shares a transformer with other devices, ensure all devices use a half-wave rectifier.

WARNING! Do not share VLX/ACM/AXCM/EXP power with any VLS. VLSs require an independent 2.4 VAC power source.

WARNING! Do not connect 24 VAC terminals to ground or equipment damage will occur. Maintain polarity of the power connection among all devices sharing power.

Communications

AXMs communicate over a simple, twisted-pair communications bus. Up to eight AXMs can connect to a single global controller in a multi-drop configuration.

Universal inputs

Configure UIs to accept resistance (10K Ohm or 3K Ohm thermistors or potentiometers), voltage (0-10VDC, 0-5VDC), current (4-20mA), dry contact, solid-state switch (transistor), or pulse-type inputs (IN-1, IN-2, and IN-3 only).

Outputs

Analog outputs support 4-20mA or 0-10VDC outputs. Binary outputs; rated for 12VA (24VAC @ 0.5A). 20VDC terminals can provide a power source up to 250mA total.
