Algorithms in English The first thing you should know is that the algorithm is not a programming language it is methods of analysis and thinking that we have to follow so you can write the code properly What s the problem with everyone being afraid of programming Most people who try to learn programming you see them they go straight in the wrong direction they start to directly study a particular programming language such as Java C C without being exposed to the principles of basic programming and without that they put the basic ideas of the program then analyzed and performed one after the other
