CO2 Acidification in Aquatic Ecosystems T. A. Del Valls,I. Riba,2022-06-12 CO2 Acidification in Aquatic Ecosystems An Integrative Approach to Risk Assessment focuses on the characterization of different aspects of ecosystem science to describe the situation of CO2 acidification in aquatic ecosystems This extensive coverage looks at the effects of CO2 acidification throughout all oceans and coastal areas In addition the book describes integrative approaches based on global case studies to determine the effects associated with this kind of acidification It allows the reader to understand the different sources of CO2 in the aquatic ecosystems and the different approaches and lines of evidence available to characterize the impact of this acidification This book provides researchers professors and post graduate students in oceanography and aquatic ecology with a new and complete tool set to address and understand the potential impacts of CO2 acidification in aquatic ecosystems Presents case studies and new data related to CO2 acidification in aquatic ecosystems Includes new approaches for understanding the behavior of organisms in aquatic ecosystems that are suffering stress from different sources of contamination at acidification conditions Provides an integrated approach to address the environmental quality in areas affected by acidification and contamination by other stressors

volume consists of background papers and reports on discussions focused on identifying major processes that cause spatial and temporal variability in properties and concentrations of organic acids in aquatic ecosystems. Scientists in aquatic chemistry, environmental chemistry, soil chemistry, organic geochemistry, water treatment technology, forest ecology and stream ecology collectively address four major questions: What is the composition of organic acids and how are they characterized? How are acid-base properties of DOC measured and modeled and how do they affect aquatic ecosystems? How do organic acids interact with solutes, surfaces and organisms? What are the temporal and spatial variations of organic acids at the ecosystem level? This volume provides an up-to-date assessment of the state of knowledge of organic acids in aquatic ecosystems and identifies promising areas of new research that deserve the attention of all scientists who study chemical and biological processes in natural waters where the importance of organic acids in such processes is not yet fully recognized.
