Additionally, the title provides insight into the historical background and the present of this influential and often volatile region. Part I sets out precise biographical details on some 6 000 eminent individuals who influence every sphere of public life in politics, culture, and society. Part II surveys the 19 Arab Countries, providing detailed information on the geography, history, constitution, economy, and culture of the individual countries. **Approaches to Teaching the Thousand and One Nights** Paulo Lemos Horta, 2023-10-10 The *Thousand and One Nights*, composed in Arabic from the eighth to the fourteenth centuries, is one of the world's most widely circulated and influential collections of stories. To help instructors introduce the tales to students, this volume provides historical context and discusses the many transformations of the stories in a variety of cultures. Among the topics covered are the numerous translations and their impact on the tales' reception; various genres represented by the tales; gender, race, and slavery; and adaptations of the stories in films, graphic novels, and other media across the world and under conditions of both imperialism and postcolonialism. The essays serve instructors in subjects such as medieval literature, world literature, and Middle and Near Eastern studies and make a case for teaching the *Thousand and One Nights* in courses on identity and race.

**Blanks, Print, Space, and Void in English Renaissance Literature** Jonathan Sawday, 2023-06-20 *Blanks, Print, Space, and Void in English Renaissance Literature* is an inquiry into the empty spaces encountered not just on the pages of printed books in c. 1500-1700 but in Renaissance culture more generally. The book argues that print culture in the sixteenth and seventeenth centuries helped to foster the modern idea of the gap where words, texts, images, and ideas are constructed as missing, lost, withheld, fragmented, or perhaps never devised in the first place. It reimagines how early modern people reacted not just to printed books and documents of many different kinds but also how the very idea of emptiness or absence began to be fashioned in a way which still surrounds us. Jonathan Sawday leads the reader through the entire landscape of early modern print culture, discussing topics such as space and silence, the exploration of the vacuum, the ways in which race and racial identity in early modern England were constructed by the language and technology of print, blackness and whiteness together with lightness, darkness, and sightlessness, cartography and emptiness, the effect of typography on reading practices, the social spaces of the page, gendered surfaces, hierarchies of information, books of memory, pages constructed as waste or vacant, the genesis of blank forms, and early modern bureaucracy, the political and devotional spaces of printed books, the impact of censorship, and the problem posed by texts which lack endings or conclusions. The book itself ends by dwelling on blank or empty pages as a sign of human mortality. Sawday pays close attention to the writings of

many of the familiar figures in English Renaissance literary culture Sidney Shakespeare Donne Jonson and Milton for example as well as introducing readers to a host of lesser known figures The book also discusses the work of numerous women writers from the period including Aphra Behn Ann Bradstreet Margaret Cavendish Lady Jane Gray Lucy Hutchinson melia Lanyer Isabella Whitney and Lady Mary Wroth
