

## Line Symbols:

Process lines		Rigid pipe Flexible pipe
Pneumatic signal		
Electrical signal		
Bus, field bus or PLC interlink		

## Other Control Symbols:

E.g. PID controllers, valve positioners  
Letter codes are PC, PC, TC pr ZC depending on process variable

		
On the detector or on the pipe, but outside a gas rack	In a gas rack	In a control rack or control room

Significance of the horizontal line:

	For equipment that is visible or accessible from the SCADA screen or when standing in front of the rack.
	Not accessible or visible to operator.

## PLC Symbols:

		
On the detector or on the pipe, but outside a gas rack	In a gas rack	In a control rack or control room

Letter codes are PC, PC or TC depending on process variable

## Flowmeters and Controllers:

	
FI, FE, FT or XMFM Volume or mass flow meter	XMFC Mass flow controller
	
FIV Rotameter with hand valve	

Mnemonic Code	Instrument Type	Example
FI	Flow indicator	Rotameter
FIV (formerly FIC obsolete)	Flow indicating control valve	Rotameter with regulation valve
FC	Flow control valve	Separate adjustment valve in front of
FT	Flow transmitter	DP meter with remote reading
FE	Flow element	LHC flow cell
xMFM	mass flow meter	
xMFC	mass flow controller

*The Professional Practice of Architectural Working Drawings* Osamu A. Wakita, Richard M. Linde, 2003-02-03 The practical comprehensive handbook to creating effective architectural drawings In one beautifully illustrated volume The Professional Practice of Architectural Working Drawings presents the full range of skills concepts principles and applications needed to create a full set of architectural working drawings This new Third Edition emphasizes the importance of communicating general design concepts through specific working drawings Chapters proceed logically through each stage of development beginning with site and foundation plans and progressing to elevations building sections and other drawings New features of this Third Edition include Coverage of the latest CAD technologies and techniques Environmental and human design considerations Supplemental step by step instructions for complex chapters Ten case studies including five fully evolved case studies Hundreds of additional computer generated drawings and photographs including three dimensional models and full size buildings shown in virtual space Tips for establishing a strategy for developing construction documents This new edition also presents completely updated material on metric conversions code analysis masonry and steel Sets of working drawings for five different buildings are followed layer by layer from design concept through the finished construction documents A companion Web site [www.wiley.com/go/wakita](http://www.wiley.com/go/wakita) includes summaries for each chapter a glossary review questions laboratory problems access to dozens of CAD drawings a complete study guide and much more The Professional Practice of Architectural Working Drawings Third Edition is an invaluable book for students in architecture construction engineering interior design and environmental design programs as well as beginning professionals in these fields

**Facilities Drafting Manual** United States. Office of Manned Space Flight, 1964 Management of Standard Graphic Symbols in a Computer-aided Design and Drafting Environment Using Neural Network Approaches Der-Shung Yang, 1994 Abstract Computer Aided Design and Drafting CADD systems have become prevalent for producing building design drawings An ultimate goal of CADD systems is to automate analyses and communication of high level design information extracted from CADD drawings a difficult task because of the lack of CADD standards Using standard graphic symbols attached with symbolic information can help but locating symbols in large libraries is difficult AUGURS is a new interactive tool designed to assist CADD users in utilizing standard symbols The task of recognizing symbols sketched by CADD users differs from traditional pattern recognition problems in several ways Standard libraries have over 1000 symbols grouped into seven disciplines The large symbol set makes training data difficult to obtain Since AUGURS is embedded in the CADD system it must be efficient and compact Also it needs to handle irregular distortion in symbols sketched by users These difficulties are lessened by the special output format that requires AUGURS to perform only admissible recognition classifying the input to a small set of plausible symbols The symbol recognition program in AUGURS is a neural network similar to the Neocognitron but is more compact and efficient and having better recognition performance The main thrust of

the AUGURS approach is a novel network structure encoded with general knowledge balancing the discriminant power and the noise tolerance of the network To handle large symbol sets another thrust of the AUGURS approach is to construct a network by first building an integrated network from the internal structures of smaller networks trained on sub tasks and then pruning unnecessary components from this integrated network This research contains an extensive empirical study of numerous related work varying conditions and parameters The results demonstrate the superiority of the AUGURS approach over many alternatives including Zipcode Nets an unconstrained network networks using such invariant features as Zernike moments pseudo Zernike moments normalized moments and Fourier Mellin descriptors the Integrated Neural Network and the connectionist gluing approach A practicality analysis shows that AUGURS can handle around 100 symbols about the size of a discipline library To enable AUGURS to handle even more symbols future work is planned to augment it with domain specific knowledge and other improvements
