Report ID#001 - Commonwealth Ombudsman

Agency: Department of Environment and Climate Change

This is the Commonwealth Ombudsman's report on the Commonwealth Ombudsman's investigation into the Department of Environment and Climate Change's handling of a complaint from a member of the public. The complainant alleged that the Department had failed to adequately respond to his request for information under the Commonwealth Environmental Protection and Biodiversity Conservation Act 1999 (the EPBC Act). The complainant had sought information about the proposed construction of a bridge across a river, which would have impacted the habitat of a rare species of fish. The Department had initially responded to the complainant's request, but the complainant believed that the response was incomplete and inaccurate. The Commonwealth Ombudsman's investigation found that the Department had failed to adequately respond to the complainant's request, and recommended that the Department take steps to improve its handling of such requests in the future.

Josephson School, The Hein J. Wellens, MD, Alfred E. Buxton, MD, Francis E. Marchlinski, MD, Peter Zimetbaum, MD, 2015-05-15 A collection of 50 of Dr Mark E Josephson's groundbreaking journal articles that demonstrate his important contributions as a pioneer and teacher of modern cardiac arrhythmology over the course of 42 years. Each article not only includes a discussion by a peer of the significance of the defining paper but also includes personal impressions of Dr Josephson as a clinical scientist, doctor, teacher, role model and friend. Auditory Mechanisms: Processes And Models - Proceedings Of The Ninth International Symposium (With Cd-rom) Alfred L Nuttall, Egbert Deboer, Peter Gillespie, Karl Grosh, Tianying Ren, 2006-08-10 The workshop brought together experts in genetics, molecular and cellular biology, physiology, engineering, physics, mathematics, audiology and medicine to present current work and to review the critical issues of inner ear function. A special emphasis of the workshop was on analytical model based studies. Experimentalists and theoreticians thus shared their points of view. The topics ranged from consideration of the hearing organ as a system to the study and modeling of individual auditory cells including molecular aspects of function. Some of the topics in the book are: motor proteins in hair cells, mechanical and electrical aspects of transduction by motor proteins, function of proteins in stereocilia of hair cells, production of acoustic force by stereocilia, mechanical properties of hair cells and the organ of Corti, mechanical vibration of the organ of Corti, wave propagation in tissue and fluids of the inner ear, sound amplification in the cochlea, critical oscillations, cochlear nonlinearity and mechanisms for the production of otoacoustic emissions. This book will be invaluable to researchers and students in auditory science.

Auditory Efferent System: New Insights from Cortex to Cochlea Paul H. Delano, Ana B. Elgooyhen, 2016-09-06 The main function of the sensory systems is the transducing of external stimuli into bioelectrical signals which are conducted through afferent pathways from sensory epithelia to the brain. However, it is known that descending projections are ubiquitous in the different sensory modalities and in the case of auditory efferents connect the cerebral cortex with sensory receptor cells. Several functions have been attributed to the efferent system, including protection to acoustic trauma, unmasking of auditory stimuli in background noise, balance of interaural sensitivity, and some cognitive functions like modulation of cochlear sensitivity during selective attention to auditory or visual stimuli. In addition, there is evidence of a possible involvement of the efferent system in the etiology or treatment of some clinical pathologies like tinnitus. In this e-book entitled *Auditory Efferent System: New Insights from Cortex to Cochlea*, we aimed to give an overview of the advances concerning the descending projections from the auditory cortex to subcortical nuclei and the olivocochlear system. In addition, different theoretical proposals of efferent functions are presented. We think that this e-book is an important contribution to the understanding of the efferent system in mammals, merging auditory cortex literature with studies performed in the olivocochlear system.
