Financial Sector Development in

Ghana James Atta Peprah, Evelyn Derera, Harold Ngalawa, Thankom Arun, 2023-01-20. This book investigates factors that contribute to the development of an efficient financial sector in Ghana. While sustainable finance has long been known to propel economic growth and development, and while many African countries have taken initiatives to develop integrated frameworks of their financial sectors that tackle developmental challenges, scholars and policymakers have always grappled with understanding of factors that enhance performance of the financial sector. In this book, an expert team of authors examines the financial landscape, central bank policies, competition, financial innovation, financial inclusion, and banking stability in Ghana, while also exploring how financing models such as enterprise finance and microfinance can be more effective in sustaining financial markets. The authors discuss how Ghana can build fortified institutions, regulatory frameworks, and productive capacity to strengthen the financial sector and foster pathways that will enhance economic development. Empirical and scientific evidence give this book a unique approach that is both qualitative and quantitative.

Domestic Regulation and Service Trade Liberalization Pierre Sauve, Aaditya Mattoo, 2003-08-29. Trade in services far more than trade in goods is affected by a variety of domestic regulations ranging from qualification and licensing requirements in professional services to pro-competitive regulation in telecommunications services. Experience shows that the quality of regulation strongly influences the consequences of trade liberalization. WTO members have agreed that a central task in the ongoing services negotiations will be to develop a set of rules to ensure that domestic regulations support rather than impede trade liberalization. Since these rules are bound to have a profound impact on the evolution of policy, particularly in developing countries, it is important that they be conducive to economically rational policy making. This book addresses two central questions: What impact can international trade rules on services have on the exercise of domestic regulatory sovereignty? And how can services negotiations be harnessed to promote and consolidate domestic policy reform across highly diverse sectors? The book, with contributions from several of the world's leading experts in the field, explores a range of rule-making challenges arising at this policy interface in areas such as transparency standards and the adoption of a necessity test for services trade. Contributions also provide an in-depth look at these issues in the key areas of accountancy.
