**Integrated Fault Seal Analysis** S. Ogilvie,S. Dee,R.W. Wilson,W. Bailey,2020-08-03 Faults commonly trap fluids such as hydrocarbons and water and therefore are of economic significance During hydrocarbon field development smaller faults can provide baffles and or conduits to flow There are relatively simple well established workflows to carry out a fault seal analysis for siliciclastic rocks based primarily on clay content There are however outstanding challenges related to other rock types to calibrating fault seal models with static and dynamic data and

to handling uncertainty The variety of studies presented here demonstrate the types of data required and workflows followed in today s environment in order to understand the uncertainties risks and upsides associated with fault related fluid flow These studies span all parts of the hydrocarbon value chain from exploration to production but are also of relevance for other industries such as radioactive waste and CO2 containment

**The Political Economy of the Eurozone in Central and Eastern Europe** Krisztina Arató,Boglarka Koller,Anita Pelle,2021-06-30 The idea for this volume came from the enigma that some Central and Eastern European CEE European Union EU member states have been keen to join the Eurozone while others have shown persistent reluctance Moreover the attitudes towards joining have seemingly not correlated with either the level of economic development or the time spent as part of the EU nor with any other rational

reason such as the level of integration into the EU real economy or the level of trust in the EU on the part of the public Therefore at first sight the answer to the question why in why out remains rather unclear The attractiveness of the currency union has nevertheless not disappeared for the CEE countries Despite the Eurozone crisis of 2010 13 it was during that time that the Baltic states introduced the euro Then after a few years of inactivity Croatia and Bulgaria successfully applied for membership of the exchange rate mechanism in July 2020 amid the economic crisis caused by the coronavirus COVID 19 pandemic At the same time the three Visegrad countries still using their national currencies Poland Czechia and Hungary no longer have a target date to join the monetary union This volume aims to discuss these issues from horizontal aspects and through country studies with contributions from expert authors from or closely related to the CEE region
