Correlated neuronal activity and its relationship to coding, dynamics and network architecture Tatjana Tchumatchenko, Ruben Moreno-Bote, 2014-12-03 Correlated activity in populations of neurons has been observed in many brain regions and plays a central role in cortical coding attention and network dynamics Accurately quantifying neuronal correlations presents several difficulties For example despite recent advances in multicellular recording techniques the number of neurons from which spiking activity can be simultaneously recorded remains orders magnitude smaller than the size of local networks In addition there is a lack of consensus on the distribution of pairwise spike cross correlations obtained in extracellular multi unit recordings These challenges highlight the need for theoretical and computational approaches to understand how correlations emerge and to decipher their functional role in the brain *Frontiers in Algorithmics* Jianxin Wang, Chee Yap, 2015-06-26 This book constitutes the proceedings of the 9th International Workshop on Frontiers in Algorithmics FAW 2015 held in Guilin China in July 2015 The 28 papers presented in this volume were carefully reviewed and selected from 65 submissions They deal with graph algorithms approximation algorithms combinatorial optimization parameterized algorithms and online algorithms
