

## 12.3 DNA Replication

### Lesson Objectives

-  Summarize the events of DNA replication.
-  Compare DNA replication in prokaryotes with that of eukaryotes.

### BUILD Vocabulary

A. The chart below shows key terms from the lesson with their definitions. Complete the chart by writing a strategy to help you remember the meaning of each term. One has been done for you.

| Term           | Definition                                                       | How I'm Going to Remember the Meaning                        |
|----------------|------------------------------------------------------------------|--------------------------------------------------------------|
| DNA polymerase | Enzyme that joins individual nucleotides to make a strand of DNA |                                                              |
| Replication    | The process of duplicating DNA                                   | <i>DNA makes a <u>replica</u> during <u>replication</u>.</i> |
| Telomere       | The tip of a chromosome                                          |                                                              |

B. As you work through this lesson, you may find these terms in the activities. When you need to write a key term or a definition, **highlight** the term or the definition.

### BUILD Understanding

**Preview Visuals** Previewing visuals and taking notes about them can help you remember what you read and review for tests. Look at the diagram of DNA Replication in your textbook. Write down any questions you may have about it. Then, as you read Lesson 3, find the answers to your questions. Organize your questions and answers in the two-column table below.

| Questions                       | Answers |
|---------------------------------|---------|
| • What causes the DNA to split? |         |
