# 12 June 2013 Human Geography Past Paper

**Vijay P. Singh**

## 12 June 2013 Human Geography Past Paper:

**The War Lawyers** Craig Jones, 2020 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders. These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers. The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza. Drawing on interviews with military lawyers and others, this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft, drones and/or ground forces and with what results. This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood. Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable, contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence.

**The State of African Cities, 2014** United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic, economic, technological, environmental, urban and socio-political transitions. Africa's economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets. Despite significant overall growth, the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems. These seem to indicate that the development trajectories followed by African nations since post-independence may not be able to deliver on the aspirations of broad-based human development and prosperity for all. This report therefore argues for a bold re-imagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options. That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change.

**The State of African Cities, 2014** United Nations Human Settlements Programme, 2013 Nairobi UN Habitat c2014 9789211325980

**Managing Global Risks in the Urban Age** Yee-Kuang Heng, 2016-03-03 The first full-length exposition of what it terms a global city/global risks nexus, this volume crosses disciplinary boundaries to draw upon research from Security Studies, Geography, Sociology and Urban Studies. Innovative in its approach, integrating theories about Global Cities with those positing a Global Risk Society, Yee Kuang Heng positions this research in the midst of two concurrent global trends that will gain more significance in coming years. The world is experiencing the consequences of not only rapid globalisation but also urbanization. In 2008 the UN declared that more than half the world's population was now urban. At the same time, highly connected global cities like New York, London, Tokyo and Singapore also face rapidly spreading global risks such as pandemics and financial crises. Unique in developing a typology of global risks that threaten a global city like

Singapore beyond its Asian focus the book also draws out thematic and policy lessons pertinent to other global cities Global cities do not simply materialize They are dependent on a range of stakeholders at various levels that produce and re produce its command and control capabilities in the face of global risks Singapore s experiences managing global risks in the financial aviation and maritime domains are common concerns shared by many countries and cities that have or aspire to develop similar critical infrastructure *Human Development Report 2013* United Nations Development Programme,2013 The pace of transformations around the world is extraordinarily swift and the consequences will be profound The rapid emergence of the Global South will transform 21st century economics and politics in ways at least as fundamental as those witnessed in the wars and technological revolutions of the 20th century This report seeks to identify how the dynamics of power voice and wealth in the world are changing

**Globalization Development and Social Justice** Ann El Khoury,2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies
