Construction: Using the provided materials (wires, batteries, bulbs, switches, etc.), students will construct their electric circuits according to their experimental design. They should follow their proposed circuit design and ensure that the circuit is properly connected and that the components are functioning correctly.

Presentation: Students will design and construct circuits that demonstrate their knowledge of the characteristics, including the flow of electric current, behavior of circuit and differences between open and closed circuits.

Assessment Criteria:

Accuracy: The students should be able to identify and classify open and closed circuits. Precise arrangement of components, explanation of behavior and characteristics of each circuit. Including the correct demonstration of the flow of electric current in the circuits.
