Engaging Students in Academic Literacies María Estela Brisk, 2014-07-25 The Common Core State Standards require schools to include writing in a variety of genres across the disciplines. *Engaging Students in Academic Literacies* provides specific information to plan and carry out genre based writing instruction in English for K-5 students within various content areas. Informed by systemic functional linguistics, a theory of language IN USE in particular ways for particular audiences and social purposes, it guides teachers in developing students' ability to construct texts using structural and linguistic features of the written language. This approach to teaching writing and academic language is effective in addressing the persistent achievement gap between ELLs and mainstream students, especially in the context of current reforms in the U.S. Transforming systemic functional linguistics and genre theory into concrete classroom tools for designing, implementing and reflecting on instruction and providing essential scaffolding for teachers to build their own knowledge of its essential elements applied to teaching the text includes strategies for apprenticing students to writing in all genres, features of elementary students' writing and examples of practice.
