Manual de mecanización de los aprovechamientos forestales

GONZÁLEZ GONZÁLEZ-LINARES, VÍCTOR, TOLOSANA ESTEBAN, EDUARDO, AMBROSIO TORRIJOS, YOLANDA, LAINA RELAÑO, RUBÉN, VIGNOTE PEÑA, SANTIAGO, 2014-01-01 El texto que presentamos bajo el título Manual de mecanización de los aprovechamientos forestales proporciona información imprescindible para la aplicación de los importantes avances tecnológicos de los últimos años a la gestión forestal sostenible. Es por tanto una herramienta necesaria tanto para los técnicos que planifican y dirigen las operaciones forestales como para los operarios que desarrollan esas tareas. Igualmente se convierte en un texto muy indicado para apoyar y complementar la formación de los estudiantes universitarios de disciplinas forestales y medioambientales y también para los de estudios profesionales relacionados con el sector forestal, especialmente los correspondientes al Certificado de Profesionalidad AGAR 0108 Aprovechamientos Forestales. También complementa y amplía los libros de esta misma editorial bajo el sello Paraninfo perteneciente al mismo Grupo Editorial sobre mecanización y aprovechamientos correspondientes a las Unidades Formativas UF 0267 UF 0269 UF 0270 UF 0273 UF 0274. El libro proporciona información detallada sobre la maquinaria portátil y automotriz empleada en el monte, describe sus características y técnicas de uso, propone normas de organización de los trabajos que se realizan con ellas y analiza las consecuencias de esos trabajos sobre el entorno. También se recogen y explicitan las principales normativas que los regulan, haciendo especial hincapié en los aspectos medioambientales y de seguridad y salud. Se incluyen recomendaciones de mantenimiento y utilización de motosierras, desbrozadoras, tractores forestales, autocargadores, cosechadoras y procesadoras, se analizan en detalle sus componentes y su mecánica y se desglosa su empleo en aprovechamientos madereros para trabajar correctamente. Todos los contenidos se enfocan y desarrollan de forma eminentemente práctica buscando que sean de fácil aplicación y se acompañan de fotografías, dibujos, ilustraciones y gráficos que complementan con claridad lo expuesto en el texto.

Silviculture Ralph D. Nyland, 2016-05-13 Silviculture Concepts and Applications reflects a belief that all the tools of silviculture have a useful role in modern forestry. Through careful analysis and creative planning, foresters can address a wide array of commodity and nonmarket interests and opportunities while maintaining dynamic and resilient forests. A landowner's needs, circumstances and site conditions guide a silviculturist's judgment and decision making in finding the best ways to integrate the biologic, ecologic, economic, financial and managerial, administrative requirements at hand. The Third Edition of this influential text provides a foundational basis for rigorous discussion of techniques. The inclusion of numerous real world examples and balanced coverage of past and current practices broadens the concept of silviculture and the ways that managers can use it to address both traditional and emerging interests in forests. A thorough

discussion of new and proven interpretations increasingly directs the attention of foresters toward the role silviculture plays in creating maintaining rehabilitating and restoring forests that can sustain an expanding variety of ecosystem services
