Figure 4B-1. U.S. surface analysis with isotherms, fronts, and station observations for 232 8 FEB 2021. Fronts were analyzed 2 hrs prior (212).

In Figure 4B-1, as is common in winter, a very strong contrast in air masses existed from Canada to Florida, an exceedingly cold Arctic air mass plunged southward. Temperatures in the upper Midwest were well below zero, yet ahead of the fronts, along the Gulf of Mexico, temperatures were well into the 60s and 70s. Isotherms were close together along the front from the Rocky Mountains to the Southern Plains.

New Mathematical Cuneiform Texts Jörn Friberg, Farouk N.H. Al-Rawi, 2017-02-13 This monograph presents in great detail a large number of both unpublished and previously published Babylonian mathematical texts in the cuneiform script. It is a continuation of the work *A Remarkable Collection of Babylonian Mathematical Texts* Springer 2007 written by Jörn Friberg the leading expert on Babylonian mathematics. Focussing on the big picture Friberg explores in this book several Late Babylonian arithmetical and metro mathematical table texts from the sites of Babylon Uruk and Sippar collections of mathematical exercises from four Old Babylonian sites as well as a new text from Early Dynastic Early Sargonic Umma which is the oldest known collection of mathematical exercises. A table of reciprocals from the end of the third millennium BC differing radically from well documented but younger tables of reciprocals from the Neo Sumerian and Old Babylonian periods as well as a fragment of a Neo Sumerian clay tablet showing a new type of a labyrinth are also discussed. The material is presented in the form of photos hand copies transliterations and translations accompanied by exhaustive explanations. The previously unpublished mathematical cuneiform texts presented in this book were discovered by Farouk Al Rawi who also made numerous beautiful hand copies of most of the clay tablets. Historians of mathematics and the Mesopotamian civilization linguists and those interested in ancient labyrinths will find *New Mathematical Cuneiform Texts* particularly valuable. The book contains many texts of previously unknown types and material that is not available elsewhere.
