They underline the importance of inclusive innovation with a deliberate objective to create net new jobs and reduce inequality. The 4IR is well established in many parts of the world with technological advances driving profound social and economic change. However, for many developing countries particularly countries in Africa, the 4IR may not offer the anticipated leap forward. There is a danger that the continent may find itself dictated to by experiences that are not in tune with its social contexts. *American Book Publishing Record*, 2007
