**Algebra for Secure and Reliable Communication Modeling** Mustapha Lahyane, Edgar Martínez-Moro,2015-06-23

This volume contains the proceedings of the CIMPA Research School and Conference on Algebra for Secure and Reliable Communication Modeling held from October 1 13 2012 in Morelia State of Michoac n Mexico The papers cover several aspects of the theory of coding theory and are gathered into three categories general theory of linear codes algebraic geometry and coding theory and constacyclic codes over rings The aim of this volume is to fill the gap between the theoretical part of algebraic geometry and the applications to problem solving and computational modeling in engineering signal processing and information theory This book is published in cooperation with Real Sociedad Matem tica Espa ola

Semigroups and Combinatorial Applications Gerard Lallement,1979 The purpose of this book is to present those parts of the theory of semigroups that are directly related to automata theory algebraic linguistics and combinatorics Publications in these mathematical disciplines contained methods and results pertaining to the algebraic theory of semigroups and this has contributed to considerable enrichment of the theory enlargement of its scope and improved its potential to become a major domain of algebra Semigroup theory appears to provide a general framework for unifying and clarifying a number of topics in fields that at first sight appear unrelated This book is intended as a textbook for graduate students in mathematics and computer science and as a reference book for researchers interested in associative structures
