This collection of ten jazz etudes with accompanying audio provides intermediate to advanced alto sax students with a fun and effective way to learn to play in the specific odd meters 3 4 5 4 7 4 and 9 4. Each etude is based on the chord progression of a different jazz standard and includes an in depth analysis of the melodic harmonic and rhythmic devices used. The addition of the odd time ingredient along with completely original melodies and improv lines converts what would be mere academic etudes to a delightful jazz listening and playing experience. If you want to improve your fluency in reading performing and improvising in odd time signatures this is the book for you. A generous number of preparatory exercises gradually introduce the student to not only reading music but also hearing how phrases land within a measure of odd time. Play along audio tracks featuring a professional rhythm section piano bass and drums minus the sax track allow you to play as the soloist.
