Writing for College: the Eight Step Program to Writing Academic Argument Papers Using the Template

Method Rebecca Smith, 2012-04-13 Writing for College the Eight Step Program to Writing Academic Argument Papers Using the Template Method is designed to help students who have been needlessly struggling with writing for their college classes because they fail to understand how college writing differs from other types of writings. This book has two goals. One to provide you the student with a template to follow in composing your own standard academic essay and two to explain how and why you should follow the process of producing original researched academic essays when trying to prove competency in English writing in colleges and universities. You know how to write what you need are the rhetorical skills to help you write better. This book can help.

Logical Argument in the Research Paper Russ Ward, 1997 Logical Argument in the Research Paper operates on the premise that collegiate level writing when cast in its most significant and sophisticated form is argumentative. Students are shown how writers examine a potential topic, establish a stance upon that topic, defend the stance, avoid reasoning and ethical errors and in general say something meaningful about the topic. It also includes instruction about finding sources, gathering information from them and correctly documenting them. However, the emphasis remains on how effective writers evaluate sources, think about the information they discover, prepare a fair and informed argument, rethink and revise the argument and finally present an argument in its completed form. Logical Argument in the Research Paper will help students learn some of the reasoning processes that all writers use when composing the academic argument.
