Argument Research Paper Topics:

Logical Argument in the Research Paper Russ Ward, 1997 Logical Argument in the Research Paper operates on the premise that collegiate level writing when cast in its most significant and sophisticated form is argumentative. Students are shown how writers examine a potential topic, establish a stance upon that topic, defend the stance, avoid reasoning and ethical errors, and in general say something meaningful about the topic. It also includes instruction about finding sources, gathering information from them, and correctly documenting them. However, the emphasis remains on how effective writers evaluate sources, think about the information they discover, prepare a fair and informed argument, rethink and revise the argument, and finally present an argument in its completed form. Logical Argument in the Research Paper will help students learn some of the reasoning processes that all writers use when composing the academic argument. *Writing and Power* Candace Mitchell, 2015-12-03 This book offers a much needed alternative to the more traditional texts used to teach writing instruction. Grounded in history, the book clarifies changing theoretical and practical approaches to teaching writing, critically assessing each approach in relation to the social and political movements of the day, both within and beyond the university. The author takes us inside the real world of writing instruction, not only from the viewpoint of instructor but as seen through the eyes of students struggling to make sense of the expectations of writing class. Mitchell emphasizes that writing entails far more than putting words to paper and delves into contextually variable, culturally defined expectations that include multiple linguistic forms, both oral and written, highlighting the complexity of writing while engaging the reader in lively academic debates about language and society. **The Harcourt Brace Guide to Writing in the Disciplines** Robert Wayne Jones, Patrick Bizzaro, Cynthia L. Selfe, 1997 Writing the Modern Research Paper Robert Dees, 2003 Writing the Modern Research Paper is a practical and contemporary guide to writing research papers, offering students advice on how to think critically throughout the research process. Designed as a complete reference, this book offers a step by step guide to research, encouraging students to think carefully and critically about such issues as audience, topic, and thesis, as well as evaluating, integrating, and citing sources appropriately. The text covers both informative and argumentative purposes for doing research, including a full chapter on reasoning and evidence in argumentative research papers. Original and realistic student examples throughout show various approaches to the methods of planning and researching. This contemporary book offers full coverage of computer research technologies, extensive attention to the prewriting and planning stages of the assignment, and pedagogy designed to encourage students to work collaboratively. There is also unparalleled coverage of the major disciplinary documentation forms: MLA, APA, CBE, and Chicago. The book also features examples from modern research sources.
