**Vaccine Education and Promotion** Graça S. Carvalho, Carlos Alberto De Oliveira Magalhães Júnior, 2025-05-13

Vaccination plays a crucial role in controlling and significantly eradicating many diseases. It reduces the burden of illness and saves countless lives worldwide. Vaccination is an essential tool in public health, directly impacting several Sustainable Development Goals (SDGs) as it contributes to better education (SDG 4), healthier populations (SDG 3), lower poverty (SDG 1) and hunger (SDG 2), and cleaner water and sanitation (SDG 6). Misconceptions about vaccines can lead people to distrust vaccination effectiveness or safety. Such misconceptions are often spread through word of mouth, social media, or alternative health communities. Therefore, vaccine education and promotion is crucial to inform and encourage people to vaccinate by providing accurate scientific information and implementing vaccination programs emphasizing their benefits, safety, and importance in preventing infectious diseases. This Research Topic focuses on new developments in vaccine education and promotion in several settings such as schools, workplaces, and communities, as well as through traditional press media and social media. We aim to include studies of public health campaigns, school health activities, production of vaccine educational materials, community outreach, and diverse communication to address concerns or misinformation about vaccines. The goal is to find ways of increasing vaccine rates and promoting public health by ensuring people make informed decisions about their health and the health of their communities. This Research Topic welcomes the submission of manuscripts focused on vaccine education and promotion that, among others, can address the following Diverse strategies for vaccine education and promotion, including but not limited to several settings (schools, workplaces, communities, etc.) and traditional press media and social media. Gender issues and health inequalities related to vaccination. Emphasis on the underlying framework, program theory, the planning, the implementation process, and the evaluation of the vaccination promotion initiative. Vaccine education and promotion initiatives, impact and lessons. Active ingredients, favorable conditions, and specific competencies for successful vaccine-promoting initiatives.

Kudzma, 2021-11-12. *Health Promotion Throughout the Life Span E-Book* **Navajo Sovereignty** Lloyd L. Lee, 2017-04-11. A companion to *Din Perspectives: Revitalizing and Reclaiming Navajo Thought*, each chapter of *Navajo Sovereignty* offers the contributors individual perspectives. This book discusses Western law's view of Din sovereignty, research, activism, creativity, and community and Navajo sovereignty in traditional education. Above all, Lloyd L. Lee and the contributing scholars and community members call for the rethinking of Navajo sovereignty in a way more rooted in Navajo beliefs, culture, and values.

**Games Girls Play** Carolyn M. Cunningham, 2020-07-06. *Games Girls Play* examines the role that video games play in girls' lives, including how games structure girls' leisure time, how playing video games constitutes different performances of femininity, and what influences girls to play or not play video games. Through interviews, focus groups, and qualitative content analyses, this book analyzes girls' involvement with video games. It also examines different contexts in which discourses of

girls and video games occur including girl oriented video games activist efforts to change the video game industry and informal education programs that teach girls video game design     *Optical Approaches to Capture Plant Dynamics in Time, Space, and Across Scales* Eetu Puttonen,Norbert Pfeifer,Alexander Bucksch,András Zlinszky,2018-08-17 Quantifying temporal changes in plant geometry as a result of genetic developmental or environmental causes is essential to improve our understanding of the structure and function relationships in plants Over the last decades optical imaging and remote sensing developed fundamental working tools to monitor and quantify our environment and plants in particular Increased efficiency of methods lowered the barrier to compare integrate and interpret the optically obtained plant data across larger spatial scales and across scales of biological organization In particular acquisition speed at high resolutions reached levels that allow capturing the temporal dynamics in plants in three dimensions along with multi spectral information beyond human visual senses These advanced imaging capabilities have proven to be essential to detect and focus on analyzing temporal dynamics of plant geometries The focus of this Research Topic is on optical techniques developed to study geometrical changes at the plant level detected within the wavelength spectrum between near UV to near infrared Such techniques typically involve photogrammetric LiDAR or imaging spectroscopy approaches but are not exclusively restricted to these Instruments operating within this range of wavelengths allow capturing a wide range of temporal scales ranging from sub second to seasonal changes that result from plant development environmental effects like wind and heat or genetically controlled adaption to environmental conditions The Research Topic covered a plethora of methodological approaches as suggestions for best practices in the light of a particular research question and to a wider view to different research disciplines and how they utilize their state of the art techniques in demonstrating potential use cases across different scales
