[The First Infantry Division and the U.S. Army Transformed](#) Gregory

Fontenot, 2017-06-30 This fast paced and compelling read closes a significant gap in the historiography of the late Cold War U.S. Army and is crucial for understanding the current situation in the Middle East. From the author's introduction My purpose is a narrative history of the 1st Infantry Division from 1970 through the Operation Desert Storm celebration held 4th of July 1991. This story is an account of the revolutionary changes in the late Cold War. The Army that overran Saddam Hussein's Legions in four days was the product of important changes stimulated both by social changes and institutional reform. The 1st Infantry Division reflected benefits of those changes despite its low priority for troops and material. The Division was not an elite formation but rather excelled in the context of the Army as an institution. This book begins with a preface by Gordon R. Sullivan General USA Retired. In twelve chapters author Gregory Fontenot explains the history of the 1st Infantry Division from 1970 to 1991. In doing so his fast paced narrative includes elements to expand the knowledge of non-military readers. These elements include a glossary a key to abbreviations maps nearly two dozen photographs and a thorough bibliography. [The First Infantry Division and the U.S. Army Transformed](#) Road to Victory in Desert Storm is published with support from the First Division Museum at Cantigny

Robotic

Persons Joshua K. Smith,2021-02-26 Robotic Persons will introduce the evangelical community to the journey of Robotic Futurism and how current and forthcoming AI driven robots will impact human value and dignity This book will consider three key areas of robotic development and the existential risks on the horizon for humans in the fields of work war and sex There are risks in the fields of work because there is a temptation to replace human workers with automation Current arguments for the benefit of war fighting robots posit that these robots will eliminate war and the risk of war but there is much more to the story Arguments for sex and companion robots proffer that they will benefit the fringe community or help those who do not have a relative to care for them but again there are many ethical and philosophical problems with these arguments Robotic Persons not only introduces the reader to these issues but also gives an evangelical response to each There is presently no evangelical work addressing these critical issues Robotic Persons will argue that granting legal personhood to qualified robots will further prevent dehumanizing use of robots and protect human dignity and value

The People's Liberation Army and Contingency Planning in China

Andrew Scobell, Arthur S. Ding, Phillip Charles Saunders, Scott Harold, 2015. How will China use its increasing military capabilities in the future? China faces a complicated security environment with a wide range of internal and external threats. Rapidly expanding international interests are creating demands for the People's Liberation Army (PLA) to conduct new missions ranging from protecting Chinese shipping from Somali pirates to evacuating citizens from Libya. The most recent Chinese defense white paper states that the armed forces must make serious preparations to cope with the most complex and difficult scenarios so as to ensure proper responses at any time and under any circumstances. Based on a conference co-sponsored by Taiwan's Council of Advanced Policy Studies RAND Carnegie Endowment for International Peace and National Defense University, this book brings together leading experts from the United States and Taiwan to examine how the PLA prepares for a range of domestic, border, and maritime contingencies. The book includes chapters on how the PLA domestic security forces and the civilian government conduct contingency planning and how military commanders can draw upon national-level military assets and mobilize civilian resources to execute their plans. Substantive chapters assess PLA planning for potential domestic contingencies such as suppressing internal unrest, border contingencies involving India, Myanmar, North Korea, Afghanistan, and Central Asia, and maritime contingencies in both the near and the far seas. Authors also examine PLA preparations and performance in disaster relief, counterpiracy, and noncombatant evacuation operations. Improving PLA capabilities are giving Chinese leaders new options to respond to domestic and international crises, but the PLA still has significant limitations in projecting and sustaining power, especially in contested environments.
