Television after TV Jan Olsson, Lynn Spigel, 2004-11-30 A critical reassessment of television and television studies in the age of new media *TV by Design* Lynn Spigel, 2008 From the Publisher While critics have long disparaged commercial television as a vast wasteland TV has surprising links to the urbane world of modern art that stretch back to the 1950s and 60s during that era the rapid rise of commercial television coincided with dynamic new movements in the visual arts a potent combination that precipitated a major shift in the way Americans experienced the world visually TV by Design uncovers this captivating story of how modernism and network television converged and intertwined in their mutual ascent during the decades of the cold war Whereas most histories of television focus on the way older forms of entertainment were recycled for the new medium Lynn Spigel shows how TV was instrumental in introducing the public to the latest trends in art and design Abstract expressionism pop art art cinema modern architecture and cutting edge graphic design were all mined for staging techniques scenic designs and an ever growing number of commercials As a result TV helped fuel the public craze for trendy modern products such as tailfin cars and boomerang coffee tables that was vital to the burgeoning postwar economy And along with influencing the look of television many artists including Eero Saarinen Ben Shahn Saul Bass William Golden and Richard Avedon also participated in its creation as the networks put them to work designing everything from their corporate headquarters to their company cufflinks Dizzy Gillespie Ernie Kovacs Duke Ellington and Andy Warhol all stop by in this imaginative and winning account of the ways in which art television and commerce merged in the first decades of the TV age

Electronic Media Criticism Peter B. Orlik,2001 Given the prominence of the electronic media in the 21st century it is crucial that both media professionals and consumers know how to decipher and evaluate media content the assumptions on which that content is based and the constraints to which it is subject Electronic Media Criticism offers a variety of critical approaches to audio and video discourse Rather than restricting itself to one perspective the book applies key aesthetic

sociological philosophical psychological structural and economic principles to arrive at a comprehensive evaluation of both programming and advertising content Maintaining the approach of the original volume this second edition includes updated chapters to reflect the current media world including sample reviews and illustrations material pertaining to new media because the book is process oriented rather than medium oriented Internet referents are interspersed in discussion of the various critical perspectives two additional scripts for critical analysis an episode of The Simpsons and an installment of the dark Canadian comedy The Newsroom and new exercises for further practice in applying critical procedures Orlik interweaves the insights of industry and academic authorities recognizing that both orientations are essential in the development of a valid and viable critical outlook Written for media students and practitioners all readers of this volume will gain feasible and flexible tools for focused and rational analysis of electronic media products as well as improved understanding of the role and essential ingredients of criticism itself
