Art Attack Manual:

The Law of Armed Conflict and the Use of Force Frauke Lachenmann, Rüdiger Wolfrum, 2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law *Expert Laws of War* Anton O. Petrov, 2020-06-26 Over recent decades international humanitarian law has been shaped by the omnipresence of so called expert manuals Astute and engaging this discerning book provides a comprehensive account of these black letter rules and commentaries produced by private expert groups and demonstrates why the general acceptance of these expert manuals is largely unjustified The author innovatively links interdisciplinary insights to the needs of military lawyers in practice showing the pitfalls of relying on private manuals as arguable restatements and interpretations of the law as it is **The Publishers'**

Trade List Annual ,1886 **Mind and Body** ,1899 **Big Data and Armed Conflict** Laura A. Dickinson, Edward W. Berg, 2024 Big data is radically reshaping the modern battlefield This book examines how bodies of international law might apply to the uses of big data and how big data exposes gaps and interpretive ambiguities in existing legal frameworks While big data holds enormous promise it also has the potential to disrupt modern warfare and the rule of law itself **Mind and Body** ,1908 Farrow's Military Encyclopedia Edward Samuel Farrow, 1885 International Law, Security, and Military Power Howard Hensel, Carlos Alberto Leite da Silva, 2025-09-01 This book contributes to our understanding and appreciation of the contemporary relevance of international humanitarian law and international human rights law by analyzing and assessing the foundational norms principles and provisions contained within these bodies It also explores the ways in which they inform and condition military doctrine and the planning and the execution of military operations in the land air cyber and space domains as perceived through the lens of two of the most important military establishments in the Western Hemisphere the United States and Brazilian militaries The expert contributors promote a better awareness and comparative understanding of the rapidly changing diverse traditional and non traditional challenges and demands of the 21st century This volume will be useful to both scholars whose research focuses on international law and military professionals
