*Managing Openness* Mona Haddad,Ben Shepherd,2011 The global financial crisis triggered a broad reassessment of economic integration policies in developed and developing countries worldwide The crisis induced collapse in trade was the sharpest ever since World War II affecting all countries and all product categories A huge shock to the trading system combined with severe macroeconomic instability makes it natural for policymakers to call into question the basic underlying assumptions of trade liberalization and openness In particular outward oriented or export led growth strategies are being reassessed as openness is increasingly associated with greater volatility However it is crucial not to lose sight of the dynamic benefits that openness can offer Examples include technology transfer increased competitive pressure that reduces markups and improves efficiency and economies of scale The real question is how to manage outward oriented strategies so as to maximize the benefits of openness while minimizing risks This book aims to contribute to this important and ongoing policy debate bringing together recent empirical work on the trade collapse its causes and consequences and the broader trade policy agenda in the post crisis environment It addresses critical policy issues revolving around the topic of outward oriented growth strategy including policy instruments that help manage risks associated with outward orientation lessons learned from the crisis for particular countries and regions and how emerging trade policy issues such as climate change commodities global production networking and migration affect the prospects for recovery and outward oriented growth

*Two Crises, Different Outcomes* T. J. Pempel,Keiichi Tsunekawa,2015-05-06 Two Crises Different Outcomes examines East Asian policy reactions to the two major crises of the last fifteen years the global financial crisis of 2008 9 and the Asian financial crisis of 1997 98 The calamity of the late 1990s saw a massive meltdown concentrated in East Asia In stark contrast East Asia avoided the worst effects of the Lehman Brothers collapse incurring relatively little damage when compared to the financial devastation unleashed on North America and Europe Much had changed across the intervening decade not least that China rather than Japan had become the locomotive of regional growth and that the East Asian economies had taken numerous steps to buffer their financial structures and regulatory regimes This time Asia avoided disaster it bounced back quickly after the initial hit and has been growing in a resilient fashion ever since The authors of this book explain how the earlier financial crisis affected Asian economies why government reactions differed so widely during that crisis and how Asian economies weathered the Great Recession Drawing on a mixture of single country expertise and comparative analysis they conclude by assessing the long term prospects that Asian countries will continue their recent

success ***Managing Economic Crisis in East Asia*** Saw Swee-Hock, John Wong, 2010 This book incorporates a selection of eight revised papers presented to the Conference on Managing Economic Crisis in East Asia organized jointly by the Saw Centre for Financial Studies NUS Business School and the East Asian Institute National University of Singapore in November 2009 The chapters present a detailed analysis of the impact of the 2008 09 economic crisis in China Hong Kong Taiwan Korea and Japan and the stimulus packages that were swiftly put in place by the governments to mitigate the economic recession and to pave the way for a quick recovery The success of the monetary and fiscal policy measures in engendering a strong economic recovery in these countries is also discussed in considerable depth The book with contributions from experts on the topics covered will be extremely valuable to businessmen analysts academics students policy makers and the general public interested in seeking a greater understanding of the global economic crisis
