

ASPHALT SUPER LATE MODEL SETUP GUIDE

version 1.1 - Thomas Brandon

When it comes to building setups whether on dirt, asphalt oval or even the road, the process that I use is basically the same. Now, on the dirt side I will always start with my base/qualifying setup and then adjust to the changing track conditions. But, on the asphalt... it's the opposite.

With the asphalt oval cars, I will always focus on building my race setup first. I will do this using the default weather, a 50% track state with the marbles and dust, and then the time of day the race is scheduled. The reason I do this is because I find it much easier to turn my race setup into a qualifying setup on the asphalt side of things.

This guide is designed to help you adjust, and create your own setups by taking you through the exact process I use to build my setups.

When making adjustments always remember to make only one adjustment at a time.

I hope this guide helps you create or adjust your setups so you can get the most out of your car and your driving ability.

THE THREE STEPS TO BUILDING A SETUP

STEP 1: DETERMINED BY TRACK
