Land Use Law for Sustainable Development Nathalie J. Chalifour, Patricia Kameri-Mbote, Lin Heng Lye, John R. Nolon, 2006-11-20 This 2007 book surveys the global experience to date in implementing land use policies that move us further along the sustainable development continuum. The international community has long recognized the need to ensure ongoing and future development is conducted sustainably. While high level commitments towards sustainable development such as those included in the Rio and Johannesburg Declarations are politically important, they are irrelevant if they are not translated into reality on the ground. This book includes chapters that discuss the challenges of implementing sustainable land use policies in different regions of the world, revealing problems that are common to all jurisdictions and highlighting others that are unique to particular regions. It also includes chapters documenting new approaches to sustainable land use such as reforms to property rights regimes and environmental laws. Other chapters offer comparisons of approaches in different jurisdictions that can present insights which might not be apparent from a single jurisdiction analysis.

Everton, 2019-05-23 First published in 1999, this book breaks new ground by treating the restrictive covenant from the aspect of the control of land use. At its heart is a detailed account of the discharge or modification mechanism, a system of practical importance to professionals in law, planning and land management. This central component is furthered by an historical account of the development of the concept from *Tulk v Moxhay*, the seminal case of 1848 to the present and by an assessment of its future in a legal system dominated by planning and environmental control. It is a study of the way in which a particular equitable doctrine has grown.
