Introduction / Motivation		
Instruction / Delivery	Sociology as a science, study social groups and human relationships which help shed new insight into the interconnectedness between the self and other people. Charles Horton Cooley, the self is not dependent on biological predispositions; rather, it is a product of social interaction. One of the pioneering contributions to sociological perspectives was Charles Cooley (1864-1929). He asserted that people's self-understanding is constructed, in part, by their perception of how others view them – a process term "the looking glass self". Sociologist Charles Horton Cooley introduced the looking-glass self to highlight that the people whom a person interacts become a mirror in which he views himself. The looking Glass Self (Cooley, 1902)	Students will give their insights about sociological perspective of self.
