Macarthur,2024-10-31 Is architecture an art like literature or music Or is it more akin to science or engineering Can buildings be artworks just like paintings and sculptures or does their fundamentally functional nature mean they cannot be considered pure works of art Questions of architecture art and aesthetics do not allow for simple answers But by asking such questions we can usefully reveal the ways in which the concepts and meanings of architecture have changed over the centuries and how they continue to change in the contemporary era Is Architecture Art explores the key conceptual questions about the aesthetic appreciation of architecture and its persistently contested status as an artform It engages the work of thinkers ranging from Hume and Kant to Adorno Tafuri and Rancière and draws on accessible and thought provoking accounts of historical and contemporary architectural and art theory Taking novel approaches to issues that will be familiar to the practising architect it shows how aesthetics and art theory can open up and illuminate architectural theory issue by issue Is Architecture Art will provoke discussion and debate among architects and architectural theorists and force a new understanding of the purpose of architectural practice in the contemporary era as the concepts of art the arts and of the creative economy have shifted and blurred as never before **A New Universal, Technological, Etymological and**
