1. ABSTRACT:

This branch of computer science is concerned with making computers behave like humans. Artificial intelligence includes game playing, expert systems, neural networks, natural language, and robotics. Currently, no computers exhibit full artificial intelligence (that is, are able to simulate human behavior). The greatest advances have occurred in the field of games playing. The best computer chess programs are now capable of beating humans. Today, the hottest area of artificial intelligence is neural networks, which are proving successful in a number of disciplines such as voice recognition and natural-language processing. There are several programming languages that are known as AI languages because they are used almost exclusively for AI applications. The two most common are LISP and Prolog. Artificial intelligence is working a lot in decreasing human efforts but with less growth.

The EU Artificial Intelligence (AI) Act Ceyhun Necati Pehlivan,Nikolaus Forgó,Peggy Valcke,2024-12-03 The EU Artificial

Intelligence AI Act A Commentary Edited by Ceyhun Necati Pehlivan Nikolaus Forgó Peggy Valcke As artificial intelligence AI systems increasingly permeate various facets of our lives there are growing concerns about their disruptive effects on society and the risks they pose to human rights democracy and the rule of law Accordingly the AI phenomenon has given rise to numerous governance frameworks at all levels of jurisdiction In this context it cannot be denied that the European Union's AI Act is the first legislation of its kind with global impact establishing horizontal rules for the development market placement

and use of AI systems. However, grasping its subtleties and intricacies poses a formidable challenge. This is the first book to offer a reference guide and research tool providing the full text of the AI Act as published in the Official Journal of 12 July 2024 along with an in-depth article by article commentary. The commentary examines each article in sequential order, ensuring a thorough understanding of every provision. More than eighty prestigious scholars and top-tier professionals, all experts in the field, collectively contribute an exhaustive exploration and analysis of the AI Act, making this volume the guide likely shaping the Act's interpretation and application in courts and establishing it as a preeminent resource for legal determinations and academic research. The authors include senior scholars, legal practitioners, judges, and regulators from top law schools, international law firms, and EU institutions. Their authoritative and respected opinions and diverse insights and perspectives will help to shape legal and regulatory frameworks for AI not only in Europe but worldwide. Lawyers, judges, and other legal professionals will benefit from the book's lucid interpretation of the AI Act, aiding in its application and compliance, thus enhancing their ability to effectively practice and uphold AI-related regulations. Professionals working in fields interested in and willing to learn more about the field of AI will find thorough guidance, making it an essential resource for anyone involved in AI development and systems design. In addition, policymakers and institutions across the globe will have the opportunity to learn from the EU's pioneering approach, helping them craft their own AI policies and legislation.

Innovations in Applied Artificial Intelligence Floriana Esposito, 2005-06-28. Intelligent systems are those which produce intelligent offspring. AI researchers have been focusing on developing and employing strong methods that are capable of solving complex real-life problems. The 18th International Conference on Industrial Engineering Applications of Artificial Intelligence and Expert Systems (IEA/AIE 2005) held in Bari, Italy, presented such work performed by many scientists worldwide. The Program Committee selected long papers from contributions presenting more complete work and posters from those reporting ongoing research. The Committee enforced the rule that only original and unpublished work could be considered for inclusion in these proceedings. The Program Committee selected 116 contributions from the 271 submitted papers, which cover the following topics: artificial systems, search engines, intelligent interfaces, knowledge discovery, knowledge-based technologies, natural language processing, machine learning, applications, reasoning technologies, uncertainty management, applied data mining, and technologies for knowledge management. The contributions oriented to the technological aspects of AI and the quality of the papers are witness to a research activity clearly aimed at consolidating the theoretical results that have already been achieved. The conference program also included two invited lectures by Katharina Morik and Roberto Pieraccini. Many people contributed in different ways to the success of the conference and to this volume. The authors who continue to show their enthusiastic interest in applied intelligence research are a very important part of our success. We highly appreciate the contribution of the members of the Program Committee as well as others who reviewed all the submitted papers with efficiency and dedication.

Logic-Based Artificial Intelligence Jack Minker,2012-12-06 The use of mathematical logic as a formalism for artificial intelligence was recognized by John McCarthy in 1959 in his paper on Programs with Common Sense In a series of papers in the 1960 s he expanded upon these ideas and continues to do so to this date It is now

41 years since the idea of using a formal mechanism for AI arose It is therefore appropriate to consider some of the research applications and implementations that have resulted from this idea In early 1995 John McCarthy suggested to me that we have a workshop on Logic Based Artificial Intelligence LBAI In June 1999 the Workshop on Logic Based Artificial Intelligence was held as a consequence of McCarthy's suggestion The workshop came about with the support of Ephraim Glinert of the National Science Foundation IIS 9S2013S the American Association for Artificial Intelligence who provided support for graduate students to attend and Joseph JaJa Director of the University of Maryland Institute for Advanced Computer Studies who provided both manpower and financial support and the Department of Computer Science We are grateful for their support This book consists of refereed papers based on presentations made at the Workshop Not all of the Workshop participants were able to contribute papers for the book The common theme of papers at the workshop and in this book is the use of logic as a formalism to solve problems in AI Research and Development in Intelligent Systems XVIII Frans Coenen,Alun Preece,2012-12-06 M A BRAMER University of Portsmouth UK This volume comprises the refereed technical papers presented at ES2001 the Twenty first SGES International Conference on Knowledge Based Systems and Applied Artificial Intelligence held in Cambridge in December 2001 together with an invited keynote paper by Professor Derek Sleeman The conference was organised by SGES the British Computer Society Specialist Group on Knowledge Based Systems and Applied Artificial Intelligence The papers in this volume present new and innovative developments in the field divided into sections on Machine Learning Constraint Satisfaction Agents Knowledge Representation Knowledge Engineering and Intelligent Systems The refereed papers begin with a paper entitled Detecting Mismatches Among Experts Ontologies Acquired Through Knowledge Elicitation which describes a systematic approach to the analysis of discrepancies within and among experts ontologies This paper was judged to be the best refereed technical paper submitted to the conference The remaining papers are devoted to topics in important areas such as agents knowledge engineering knowledge representation planning and constraint satisfaction with machine learning again the largest topic covered in terms of the number of papers accepted for publication This is the eighteenth volume in the Research and Development series The Application Stream papers are published as a companion volume under the title Applications and Innovations in Intelligent Systems IX
