A Survey of Sustainable Development Jonathan Harris, Timothy Wise, Kevin Gallagher, Neva R. Goodwin, 2013-04-16 Perpetual economic growth is physically impossible on a planet with finite resources. Many concerned with humanity's future have focused on the concept of sustainable development as an alternative as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals. Sustainable development brings together elements of economics, public policy, sociology, ecology, resource management, and other related areas, and while the term has become quite popular, it is rarely defined and even less often is it understood. *A Survey of Sustainable Development* addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development. It offers a broad overview of the subject and gives the reader a quick and thorough guide to this highly diffuse topic. The volume offers ten sections on topics including economic and social dimensions of sustainable development, the North-South balance, population and the demographic transition, agriculture and renewable resources, energy and materials use, globalization and corporate responsibility, local and national strategies. Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature, followed by two to three page abstracts of the most important articles or book chapters on the topic. *A Survey of Sustainable Development* is the sixth and final volume in the *Frontier Issues of Economic Thought* series produced by the Global Development and Environment Institute at Tufts University. Each book brings together the most important articles and book chapters in a frontier area of economics where important new work is being done but has not yet been incorporated into the mainstream of economic study. The book is an essential reference for students and scholars concerned with economics, environmental studies, public policy, and administration, international development, and a broad range of related fields.

Focus, 2005

The Future of the Gulf Region Arno Tausch, 2021-08-09 This book studies values and attitudes in the Gulf region. In light of global power shifts, the threatening collapse of internal security in the West, and uncertainty about the current leadership vacuum in world society, this book explores a future leading role of the Gulf countries in such institutions as the G 20 and the OECD. Based on rigorous analysis of macro-level data and opinion surveys with relevance for the Gulf region, it analyzes the global macro factors shaping the Gulf's future at a time of the global COVID 19 crisis and depression and rising global tensions. Starting with an empirical time series analysis of the long cycles of global politics and economics, it highlights the implications for the Gulf region. Offering a multivariate analysis of civil society values in the Gulf, the author analyzes value changes and attitudes on antisemitism, political Islam, internal security, democracy, and other issues of Arab politics. The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf's civil society and strongly suggest that the Gulf's future is rather with the free societies of the West and not with a Neo Ottoman Empire in whatever form.
